

INVESTMENT STYLE

The TBF GLOBAL TECHNOLOGY fund invests worldwide in technology companies and, depending on the assessment of the fund management, focuses on current or future topics in the technology, media and telecommunications sectors. Likewise, with the support of the internal company analysis, titles are selected that can be classified as either market or innovation leaders. In addition, ESG criteria are taken into account throughout the investment process.

AWARDS

RISK & INCOME PROFILE

OPPORTUNITIES

Exploiting opportunities for growth in the equities markets. When investing in assets denominated in foreign currencies, the fund unit value may be positively affected by changes in exchange rates.

Hedging opportunities through the possible use of derivatives.

RISKS

Share prices may fluctuate sharply due to market conditions, and prices may fall at any time.

When investing in foreign currencies, the fund's unit value may be negatively affected by changes in exchange rates.

If derivatives are used, it is possible that the value of the fund will be affected more negatively than would have been the case if the assets were purchased without using derivatives. This may in turn increase the fund's risk of loss and volatility (fluctuation in value).

Please see the sales prospectus for detailed information concerning risks and opportunities.
