

INVESTMENT STYLE

The TBF SMART POWER invests in companies that are active globally in the development of intelligent power networks ("Smart Grid / Transmission and Distribution") as well as in the areas of "Power Management / LNG Infrastructure" and "Energy Efficiency / Renewables". This enables the global equity fund to invest in the entire value chain of energy infrastructure and industry. In addition, strict ESG criteria are taken into account throughout the investment process, both in the case of exclusions and in the fundamental analysis.

AWARDS

RISK & INCOME PROFILE

OPPORTUNITIES

Exploiting opportunities for growth in the equities markets. When investing in assets denominated in foreign currencies, the fund unit value may be positively affected by changes in exchange rates.
 Hedging opportunities through the possible use of derivatives.

RISKS

Share prices may fluctuate sharply due to market conditions, and prices may fall at any time.
 When investing in foreign currencies, the fund's unit value may be negatively affected by changes in exchange rates.
 If derivatives are used, it is possible that the value of the fund will be affected more negatively than would have been the case if the assets were purchased without using derivatives. This may in turn increase the fund's risk of loss and volatility (fluctuation in value).

Please see the sales prospectus for detailed information concerning risks and opportunities.
